

Meropenem for Injection in B. Braun's DUPLEX[®] delivery system.

Designed to save time, labour, and
resources.

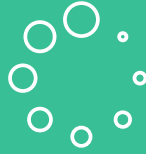

DUPLEX Ready-to-use, two compartment containers keep pre-measured medication and diluent separate until you're ready to mix and administer.

Designed for Safety and Convenience

- **Safety:** Designed to avoid delivering diluent without drug
- **Savings:** Removes the need for vial connections and reduces your compounding burden
- **Storage:** Stores at room temperature at point of care with 36 months expiration dating

DUPLEX® Drug Delivery System

Without the Wait

The ready-to-use, two-compartment container that keeps pre-measured medication and diluent separate until you're ready to mix and administer

Less Means More

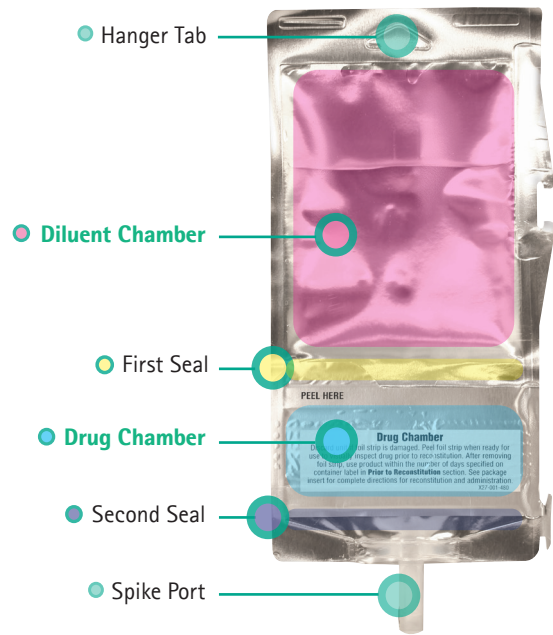

Without the need for syringes, vials, or added steps that slow you down; we help you save time, resources, and labor

Patient Protection

The closed-system is designed to prevent contamination, protect potency, and ensure diluent cannot be delivered without the drug

Two-Compartment Container

Ready When You Are

"PEEL"

Peel foil strip from drug chamber.

"SNAP"

Fold container just below diluent meniscus and squeeze until seal between diluent and powder snaps open.

"SHAKE"

Shake diluent and powder thoroughly to mix.

"SNAP"

Squeeze folded container just below the solution meniscus to snap the second seal and release liquid into the port.

"GO"

Remove foil tab from set port and spike bag. Hang bag on IV pole.

Refer to product monograph for complete directions for use and prescribing information.
